

SUMMARY

Frontend engineer with 3+ years of experience building production web apps in React and TypeScript. I own the frontend end to end, from requirements through production deployment, with hands-on experience in real-time features (WebSocket, WebRTC, SignalR), AWS/GCP deployment, and Python/SQL backend work.

SKILLS

Frontend	React, TypeScript, JavaScript, Next.js 14 (SSR, Server/Client Components), React Router, Vite, React Query, Zustand, PWA, Tailwind CSS, MUI, Bootstrap, jQuery
Real-time	WebSocket, WebRTC, SignalR
Backend / Cloud	Python, SQL · AWS (Route 53, CloudFront, S3), GCP, Docker, Nginx
Tools	Git, Jira, Notion

EXPERIENCE

JustXtar Technology — Frontend Engineer

Jan 2026 – Sep 2026 · 9 mos · Neihu, Taipei

Community property management admin system · sole frontend developer

- Built and deployed the frontend for 18 business modules solo, from features and shared components to production.
- Built a cloud intercom with WebSocket signaling and WebRTC voice: ICE buffering, heartbeats, token-expiry reconnect.
- Added token-refresh concurrency control and request replay so concurrent 401s trigger only one refresh.
- Handled network outages with an offline error page and recovery flow, improving UX under failure conditions.
- Decoupled per-environment API config with an Nginx reverse proxy so Staging and Production share one Docker image.

Tianyu Software — Frontend Engineer

Sep 2024 – Dec 2025 · 1 yr 4 mos · Neihu, Taipei

Dual-platform sports live-streaming site

- Developed and maintained the Next.js 14 web platform, building real-time messaging, i18n, and form submission.
- Built the mobile SPA with React Router and Vite; developed and maintained its PWA features.
- Fixed cross-device UI issues: device-specific CSS, plus layout shifts from the iOS safe area and on-screen keyboard.
- Worked on dynamic domain switching to keep domains from being blocked by the Great Firewall, improving availability.
- Set up AWS Route 53, CloudFront, and S3 for DNS resolution, CDN, and static frontend hosting.
- Built a SignalR gift system that syncs gift animations to every user's screen in real time.

Horti Technology — Frontend Engineer

Jun 2022 – Mar 2024 · 1 yr 10 mos · Zhubei, Hsinchu

- Wafer Map Generator:** Adopted p5.js for Canvas rendering in place of the native implementation, cutting ~500 lines of code; delivered two custom client requests within 3 weeks.
- Web FTP:** Built the frontend with Bootstrap + jQuery and a backend API with Python ftplib, streaming file-processing progress in real time via WebSocket.
- Web VNC:** Developed a browser-based remote monitoring UI with noVNC, eliminating engineers' physical trips to the lab; supported multiple connections and used periodic screenshots instead of persistent streams to reduce page load.
- Web SSH:** Built a full in-browser terminal on the WebSSH API, supporting synchronized commands across multiple terminals with auto-stop and error messages on failure.
- Replaced backend loop lookups with SQL queries and added frontend lazy loading, significantly speeding up search and loading for large lists.

SIDE PROJECTS

interactive-resume

Aug 2026 – Present

my-resume-86.vercel.app · github.com/leoooo/interactive-resume

- Personal resume site with an AI career Q&A chatbot, an interactive three.js 3D model, EN/ZH and dark/light modes.

EDUCATION

Yuan Ze University

Sep 2017 – Jun 2021

Bachelor's degree, Information Communication

LANGUAGES

Mandarin Chinese — Native**English** — Intermediate (TOEIC 550); 2 months of language school abroad
